PROFILE

I am a second year student at University of Debrecen with basic to intermediate experience in the use of SQL, C, Python among others, also i'm currently pursuing Knowledge in Web development. Eager to learn and understanding the world of tech is ever-evolving, i work on personal projects, purchase courses and study to improve myself.

While i acknowledge there is much to learn on the internet and in school, none of them offer the opportunity to solve real-life problems nor do they offer experience mentors who could guide you, hence my application for this role.
